FECHO CONCHA FLARE 220

MONTAGEM

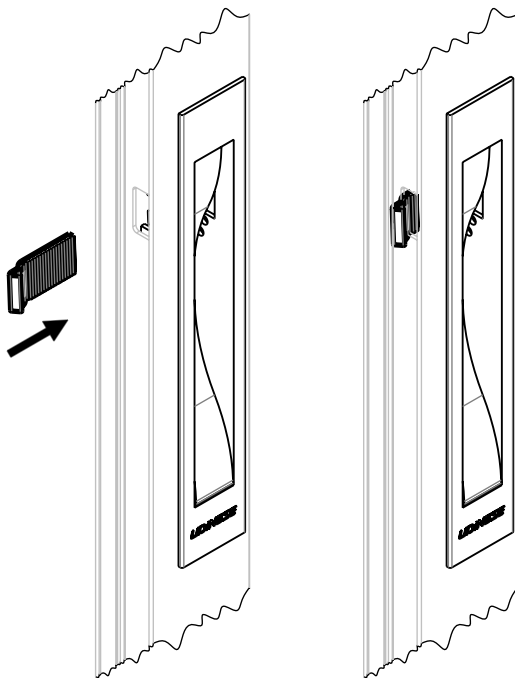

1. Para realizar o encaixe da Concha no perfil o posicionamento inicial se dá pelo lado oposto a mola de fixação.

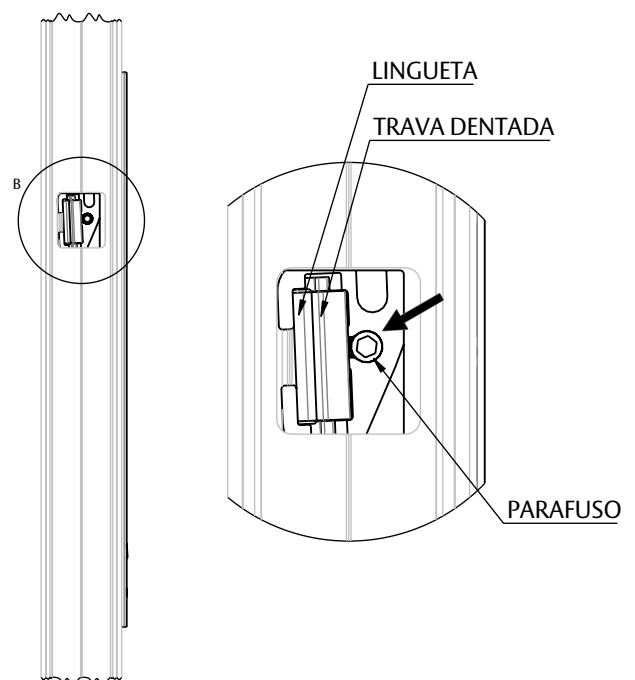

2. Pressionar a extremidade da Concha que não possui a mola contra a parede da usinagem do perfil (F1). Em seguida, pressionar a outra extremidade contra o perfil da esquadrinha (F2) até que seja feito o encaixe como mostra a figura ao lado.

3. Realizar o posicionamento exato da Lingueta na Trava Dentada em relação a perfeita distância do Contra Fecho.

4. Apertar o Parafuso Allen Sem Cabeça M5 para fixar a Lingueta na posição desejada.
